

Sehoon Kim

Daegu, South Korea | sehoon.kim@digipen.edu | linkedin.com/in/sehoon-kim-7ba184408 | github.com/boyandy2905

EDUCATION

Keimyung University / DigiPen-KMU Program

Mar 2025 - Present

Daegu, KR

- Coursework includes C++ Programming, Data Structures, Computer Graphics, Game Development, Mathematics, and Physics.

Keimyung University / DigiPen-KMU Program

Mar 2022 - Dec 2022

Daegu, KR

- Coursework included p5.js, binary systems, linear algebra, and foundational computing topics.

TECHNICAL SKILLS

Programming Languages: C, C++, JavaScript, HTML, CSS

Graphics / Web: OpenGL basics, WebGL-compatible demos, procedural geometry concepts, shader-based rendering concepts

Computer Science: Object-oriented programming, data structures, algorithms, debugging, mathematical problem solving

Tools: Visual Studio, CMake, Git, GitHub, GitHub Pages

Interpersonal Skills: Adaptable, responsible, team-oriented, solution-focused

WORK EXPERIENCE

Student, Keimyung University

Mar 2025 - Present

Daegu, KR

- Continuing undergraduate studies focused on computer science, game development, real-time graphics, mathematics, and physics.

Military Service

Feb 2023 - Aug 2024

Namyangju, Gyeonggi, KR

- Completed mandatory military service while developing discipline, responsibility, teamwork, and adaptability.

Student, Keimyung University

Mar 2022 - Dec 2022

Daegu, KR

- Began undergraduate coursework in programming, computing fundamentals, linear algebra, and interactive media.

PROJECTS

CS250 Graphics Design Coursework

2026

Daegu, KR

- Developing graphics-focused coursework for Computer Graphics II using C++ and WebGL-compatible portfolio pages.
- Practicing real-time rendering concepts, scene presentation, project documentation, and browser-based demo organization.

CS200 Graphics Design Coursework

2025

Daegu, KR

- Completed graphics programming assignments focused on foundational rendering, math-based transformations, and visual output.
- Built coursework with attention to clean project structure, debugging, and assignment requirement compliance.

CS280 Data Structures Coursework

2026

Daegu, KR

- Studying and implementing advanced data structures with emphasis on correctness, memory management, and algorithmic analysis.
- Practicing organized C++ implementation, testing, and debugging against strict assignment specifications.

CS180 Data Structures Coursework

2025

Daegu, KR

- Learned foundational data structure concepts and problem-solving techniques used in game and software development.
- Applied programming fundamentals to structured assignments and coursework exercises.
